Internship

Deloitte (Virtual Internship) — Data Analytics **April 2024**

Data Analytics

- Worked on cleaning and organizing data using Excel, SQL, and Python to make it easier to analyze.
- Used Excel and SQL to remove errors and fix missing values , helping the data become more accurate.
- Created simple and clear dashboards in Power BI/Tableau to show important information in an easy-tounderstand way.
- Studied the data to find trends, patterns, and useful insights for better understanding of the business.
- Prepared a summary of the findings and presented the insights in a clear and easy manner

Summer Intern **June 2025 - July 2025**

LPU – Data Analytics

- Gained hands-on experience in **Data Analytics Essentials** including **SQL, Python, Power BI, Tableau, and Microsoft Excel**
- Performed **data cleaning, analysis, and visualization** to extract meaningful insights from datasets
- Created **interactive dashboards and reports** using **Power BI and Tableau**
- Worked with **SQL queries** for data extraction and **Python** for basic data analysis and automation

Projects

Stopwatch & Timer PWA | *HTML, CSS, JavaScript, Responsive Web Design* **May 2025 - June 2025**

- Constructed a clean and easy-to-use Stopwatch and Timer web app using HTML, CSS, and JavaScript, with smooth start, stop, pause, and reset features.
- Integrated useful options like lap tracking, session history, themes, offline support, and PWA installation so users can run it like a mobile app
- Designed the interface to be lightweight, fast, and responsive, working well on both phones and laptops.
- Github Repository Link: https://github.com/anku83/Watchy

Typing Speed Test Web App | *HTML, CSS, JavaScript, Responsive Web Design* **Dec 2025 - Jan 2026**

- Developed an interactive Typing Speed Test web application using HTML, CSS, and JavaScript to help users measure and improve typing performance.
- Implemented real-time calculation of typing speed (WPM), accuracy, and error detection while the user types predefined text.
- Added dynamic visual feedback for correct and incorrect keystrokes to enhance user engagement and learning.
- Designed a clean, lightweight, and fully responsive interface that works smoothly across desktops, tablets, and mobile devices.
- Utilized modern front-end tooling and best practices to ensure fast performance and maintainable code structure.
- Github Repository Link: https://github.com/anku83/typing-speed-test

Road Condition Classification System| *Python, ML, Flask/FastAPI* **Oct 2025 – Nov 2025**

- Trained a machine learning model to classify different types of road conditions using a labeled dataset.
- Cleaned and prepared the dataset, applied label encoding, and saved the trained model for real-time predictions.
- Built a simple backend app that loads the model and predicts road condition when new data is given.
- Github Repository Link: https://github.com/anku83/road-condition-classification-streamlit

Certificates

AI Foundation Certified **October 2025**

Oracle – Certificate Link

Generative AI Certified **October 2025**

Oracle — Certificate Link

CodeXtreme 2.0 **April 2024**

Neo Codeathon —Certificate Link

Data Analytics **April 2024**

Deloitte —Certification Link

Data Analytics Essentials **July 2025**

LPU — Certification Link

Technical Skills

Languages C++, Java, JavaScript , python , HTML , CSS

Technologies/Frameworks: Excel, Tableau, PowerBI, My SQL ,Pandas , Numpy , Matplotlib , JupyterNotebook , Supervised Learning , NLP, Unsupervised Learning, React Js

Skills: Data Structures and Algorithms, Problem-Solving, Team Player, Project Management, Adaptability

Education

Lovely Professional University Punjab **2023 – 2027**
Computer Science and Engineering — CGPA: 6.70 *Jalandhar, Punjab*

RLSY College **2021 – 2022**
12th with Science — Percentage: 70.4% *Koderma, Jharkhand*

A +2 Uchch Vidyalaya **2019 – 2020**
10th — Percentage: 70.2%
Koderma, Jharkhand

ACHIEVMENTS

-Secured a position in the Top 30 of the CodeXtreme 2.0 Neo Codeathon
-Successfully certified in Oracle AI Foundation and Generative AI, validating expertise in core AI
